## READ THIS FIRST:

This instruction sheet contains the technical specifications required for recalibrating your carburetor. To locate your list number, use the examples in the **LOCATING THE LIST NUMBER** section below. Locate the list number in this manual. It's a good idea to highlight the technical information for the carburetor, so that it may be located easily during the rebuild. When reassembling the carburetor, use the specifications given to make the correct adjustments for the list number of your carburetor. Use the **REBUILD AND ADJUSTMENT** manual during reassembly for a step by step guide for performing each of the adjustments. This kit may also contain universal part assortments, resulting in throw away or excess in the number of parts that are actually required for servicing any one carburetor. In the case of duplicate gaskets or parts, compare with old pieces.

It is our intent to provide the best possible products for our customers: products that perform properly and satisfy your expectations. Should you need information of parts assistance, please contact our technical service department at 1-270-781-9741, Monday through Friday, 7 a.m. to 5 p.m. Central time. Please have the part number of the product you purchased when you call.

## LOCATING THE LIST NUMBER:

The List number for a Model 2010, 2300, 4010, 4011, 4150, 4160, 4165, or 4175 carburetor can be found on the **right side of choke air horn**. The List number for the 4500 can be found on the top of the main body casting. Below the list number is a date code that will contain no more than four (4) digits. See Figures below.
